 - a. Need to register:
 - i. Name
 - ii. Email
 - iii. Phone
 - iv. CV Link
 - v. Password
 - b. User will be avail to login
 - c. User can perform Test
 - i. Test will be appeared in user user dashboard.
 - ii. Mark will be showed after quiz submission.
 - iii. Ensure the security of the quiz module. (Make sure that hackers can not take any kind of advantage)

Recommendations:

1. Use Laravel, MySQL
2. Don't look for UI design & responsiveness.
3. We will only look at functionality.
4. Use of Laravel Migration, Seeding, Cache if needed.
